

Java Popup Script

In this guide I will be showing how to implement a simple Javascript popup in to your mobile landing page.

Step 1: Copy the Javascript code below. (You can edit the text in between the " marks and add new paragraphs by adding \n\n at the end of a word or sentence.)

```
1 <script>alert("Hello!\n\nI am a pop up.");</script>
```

Step 2: Insert the Javascript code before the </head> on your mobile landing page.

You can download a working example of a Javascript popup by clicking the link below.
